

TRIAL RESULTS

EXECUTIVE SUMMARY

BASIL

Research on the effect of products containing SumaGrow® on Basil in Guatemala

The two above pictures were taken at planting. The photo on the left was treated with a product containing SumaGrow® and the photo on the right was treated with the grower standard fertilizer regimen. Notice the equality of the plants.

Two weeks later notice the size difference of the basil treated with a product containing SumaGrow® (left) and the basil treated with the grower standard (right).
