

# TRIAL RESULTS

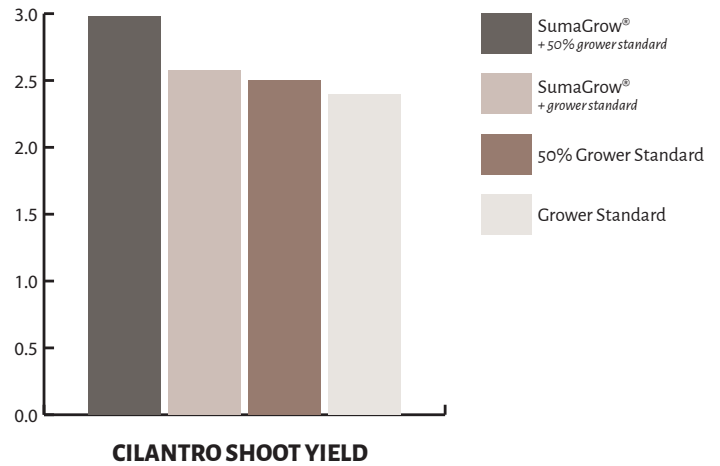

## EXECUTIVE SUMMARY

# CILANTRO - MISSISSIPPI

Research on the effect of products containing SumaGrow® on Cilantro at Mississippi State University

CILANTRO YIELD	
Treatment:	# of Fruits
SumaGrow® + 50% grower standard	2.98
SumaGrow® + grower standard	2.58
50% Grower Standard	2.5
Grower Standard	2.4

### THE CASE FOR FERTILIZER REDUCTION:

Products containing SumaGrow® are known for substantially increasing crop yields and reducing fertilizer dependence.

Several university and controlled studies, including Mississippi State University have strongly indicated that when using products containing SumaGrow®, the reduction and even elimination of fertilizer is necessary to achieve the highest yield increases.

Notice in the above chart the treatment producing the highest yields was the SumaGrow® combined with only half the recommended fertilizer application.
